

THE POW(D)ER OF NATURE

WONDER PROTECT is a 100% natural state-of-the-art powder that combines the beneficial properties of polyphenols from lignocellulose and resins produced by different species of pine and conifers.

POLYPHENOLS

Polyphenols are the most represented antioxidant molecules in the plant kingdom.

General actions of polyphenols:

- **ANTIOXIDANT:** protect cells from damage caused by free radicals, which develop with normal cellular metabolism and due to events such as emotional and physical stress, viral and bacterial attacks, radiation, pollutants, UV rays, etc.
- **ANTIATEROGEN:** against the development of arteriosclerosis and related diseases (stroke, thrombosis and cardiovascular diseases in general).
- **ANTI-INFLAMMATORY - ANTIBACTERIAL and ANTIVIRAL**

THE RESINS

Pine resins have several properties:

- **ANTISEPTIC** for the urinary, respiratory and liver tracts;
 - **EXPECTORANT-FLUIDIFIER** of bronchial secretions;
- **PURIFYING, STIMULATING and ENERGIZING** against efforts and stress;
 - **BALSAMIC, SEDATIVE, ANTI-INFLAMMATORY and ANTIREUMATICS.**

WONDER PROTECT ACTIONS ON PIGEON METABOLISM

1. **ANTIOXIDANT and ANTI-INFLAMMATORY** in racing period, breeding and young birds
2. **ENHANCEMENT OF THE IMMUNE SYSTEM** at all levels
3. **HELP ON METABOLISM** in controlling intestinal diseases
4. **HELP ON METABOLISM** in controlling diseases of breathing system.

INSTRUCTIONS FOR USE

WONDER PROTECT must be used on moistened grains at 10/15gr per kg of food.

In racing season the 3 days after the race to purify the birds from the toxins of the effort and to prepare them for the next race. There are no effects due to overdose. To better pigeons performances and condition it should be used no less than 2/3 days per week.
